ABOUT

AI/ML Engineer with **4+ years of experience** in production software engineering, machine learning, data pipelines, and Generative AI. Experienced in building **Python-based AI applications, RAG pipelines, multimodal AI workflows, REST APIs, and ML solutions** using Azure OpenAI, Azure AI Search, Azure Video Indexer, LangChain, LangGraph, FastAPI, and AWS. Strong understanding of **SDLC, data preprocessing, model evaluation, retrieval, observability, debugging, and production AI reliability**.

SKILLS

Languages: Python, SQL

Machine Learning: Classification, Regression, Feature Engineering, Random Forest, XGBoost, SVM, Model Evaluation, Imbalanced Learning, Anomaly Detection

Generative AI: LLMs, Prompt Engineering, RAG, Embeddings, Vector Search, Tool Calling, Guardrails, AI Agents

Frameworks: LangChain, LangGraph, FastAPI, Flask, Scikit-learn, Pandas, NumPy

Cloud & AI: Azure OpenAI, Azure AI Search, Azure Video Indexer, Application Insights, AWS, GCP

Engineering: MCP, REST APIs, ETL/Data Pipelines, SDLC, Git, Logging, Debugging

Observability: LangSmith, Application Insights, LLM Tracing & Monitoring

EDUCATION

• **Professional Degree** – Advanced Data Science & Generative AI [IIT Guwahati] | **2025–2026**

• **B.E. Computer Science & Engineering** — Shivaji University | CGPA: 8.0 | **2018–2021**

• **Diploma** — Computer Science & Engineering — MSBTE | CGPA: 9.0/10 | **2015–2018**

EXPERIENCE

Learnbay – AI Engineer

MULTIMODAL AI COMPLIANCE AUDITOR

Azure OpenAI | Azure AI Search | Video Indexer | LangGraph | LangSmith

- Built a **multimodal AI solution** for video/text compliance analysis and automated report generation.
- Used **Azure Video Indexer** for video content extraction and **Azure AI Search** for relevant-context retrieval.
- Used **Azure OpenAI + LangGraph** for multi-step compliance reasoning and workflow orchestration.
- Integrated **LangSmith and Application Insights** for LLM tracing, monitoring, and reliability.
- Incorporated guardrails for **prompt injection, sensitive data, and response validation**.

ENTERPRISE HR RAG ASSISTANT

Azure OpenAI | RAG | LangChain | FastAPI | Vector Search

- Developed an enterprise **RAG-based HR assistant** for policies, leave, benefits, and onboarding.
- Implemented **document ingestion, chunking, embeddings, vector retrieval, Top-K context selection, and LLM generation**.
- Built a **FastAPI backend** with session/context handling.

- Applied **PII protection, RBAC, prompt-injection guardrails, audit logging, and response validation**.
- Evaluated retrieval using **Recall@K, Precision@K, MRR** and response quality using faithfulness/context metrics.

Real-Time Fraud Detection & Prevention System

- Built a machine learning-based fraud detection model to identify fraudulent ATM transactions, addressing severe class imbalance and leveraging transaction, location, vulnerability, and network-related features for real-time fraud prevention.
- Tech Stack: Python, Pandas, NumPy, Scikit-learn, XGBoost, SMOTE, Feature Engineering, SQL, FastAPI, AWS (S3, EC2), Docker, Git/GitHub

---

Persistent Systems — Lead Software Engineer

• Architected low-latency Android audio pipelines and integrated Zebra Volume Control frameworks into production builds.
• Eliminated streaming latency by decoupling conflicting hardware scanner and keyboard data streams.
• Built Python data pipelines on AWS, improving framework KPI streaming efficiency by 20%.

Harman Connected Services — Software Engineer

• Engineered automated validation pipelines for Android CTS, GTS, and VTS frameworks.
• Reduced platform debugging cycle time by 25% through CTS-on-GSI package deployments and defect isolation.
• Automated framework test cases and system-log parsing with Python, reducing regression rates by 20%.
• Executed post-silicon validation across GPU and multimedia modules while automating reporting and KPI dashboards.
